Note: A 90-percent confidence interval is a measure of an estimate's variability. The larger the confidence interval in relation to the size of the estimate, the less reliable the estimate.

Note: For explanation of standard errors, see "Standard errors and their use" at

http://www.census.gov/hhes/www/income/p60_229sa.pdf

¹ The 2004 data have been revised to reflect a correction to the weights in the 2005 Annual Social and Economic Supplement. The estimate also reflect improvements to the algorithm that assigns coverage to dependents.
